

Math Homework Resources for Parents

Thank you for supporting your child's education by helping with homework to reinforce skills at home! Below are resources for you and your child to use during homework time.

All Grades

[Pearson Realize](#) – direct connection to our Pearson Envision 2.0 math series resources (online textbook and tutorial videos; requires a student login/password (supplied by your child's teacher))

Pearson BouncePages (app) – works in conjunction with our math series to bring textbook pages to life

www.khanacademy.org – online tutorial videos for any math concept

www.mathisfun.com – a variety of math resources for all grades

For Elementary Grades

abcya.com – a variety of math games (and more!)

<https://xtramath.org/#/home/index> - extra math resources for students and parents

Additional Apps (can be found in the Apple App Store)

Math Bingo: This app lets students practice their math facts in a Bingo game. They can choose the operation and the level of difficulty.

Splash Math: This one is a little pricey, but many different skills for kids to practice.

Aaah! Math Zombies: A fun way to practice math facts.

Math Ninja: This is another themed math fact app that kids will love to play! You can customize which operations are turned on and the level of difficulty. When you answer math facts correctly, you earn money to upgrade your ninja.

Hungry Fish: In this app a fish swims around with a number on it. Students have to make the number in order to feed the fish and make it grow bigger. For example, in the addition level, the fish might have the number 6 on it. You could combine 4 and 2, a 5 and 1, or two 3s in order to make a 6 for the fish to eat. You can change the difficulty and have larger numbers on the fish.

Top-It: There is an addition and subtraction version of this app. This app is designed for two players. They each get dealt two cards and either add or subtract the numbers (depending on the app). Then they compare their numbers. Two skills in one game!

Mathmateer: This used to be called Rocket Math. Students earn money by solving math facts. Then they use their money to design a rocket. Then they get to launch their rocket and use math to get it to fly higher

Sushi Monster: Like Hungry Fish, students have a target number that they have to make. I like both apps because students get to practice their math facts a different way. Instead of drilling $4 + 8$, they focus on different ways to make 12.

Timed Test by FormSoft Group – free version provides basic practice of math facts in addition; the paid version allows for customizable timed tests using all four operations

For Middle School Grades

www.purplemath.com – online math help for grades 5 and up

www.coolmath.com – online math help for middle school math grades

www.softschools.com – create math worksheets, online quizzes, and more for practice

www.virtualnerd.com – online tutorial videos for math grades 6 and up

www.mathplanet.com – online math help for Pre-Algebra, Algebra, and beyond
